MAYOR
Honorable Mark D. Boughton

PUBLIC WORKS DIRECTOR
Antonio Iadarola, P.E.

August 29, 2011

Honorable Mayor Mark D. Boughton
Honorable Members of the Danbury City Council
155 Deer Hill Avenue
Danbury, CT 06810

RE: Monthly report for July 2011

Dear Mayor Boughton and Members of the City Council:

I am pleased to present the Public Works Department report for the month of July.

Our Capital Projects summer work is in full force and is making great progress. The school buildings summer boiler project is on schedule and we should be ready for the new heating season. The Filed Turf Replacement Project is ahead of schedule. We expect to complete the high school field in August.

All divisions have planned summer projects which are all underway. These projects have been executed on top of their regularly scheduled work activities.

The Headstart Project building demolition is out to bid and the design of the new building is underway. We will schedule several meetings with the Headstart staff to review the design within the next few weeks and move into final design drawings.

Should you have any questions regarding any of the separately submitted division reports please call me at 203-797-4537.

Construction Services report submitted by Thomas H. Hughes III, Superintendent:

Backus Avenue Bridge over Miry Brook: The project was bid in December with a spring construction start. Project was completed and opened to traffic on October 22, 2010. Semi Final inspection was held on November 2, 2010. Final inspection held May 25, 2011. The project is now in the closeout phase with ConnDot.

B.I. Access Project: (Earthmovers) We have extended the grant & project through the Department of Economic Development till 12/11. This will allow us to use the remaining grant monies to install additional sidewalk and lighting on the median as you enter Old Ridgebury Road from Mill Plain Road. This work is finished and the project is now complete. The additional work performed was at no cost to the City of Danbury and is fully funded by the State of CT DECD. Construction Services has taken over the project inspection from our consultant VHB. We are now entering the closeout phase of the project with VHB & the DECD.

White Street ARRA Project: The contract was bid with A&J Construction as the low bidder. The contractor completed the paving on 8/30/10 and is at substantial completion work. We have requested to do some additional work on White Street under the project's ARRA funding. ConnDot has agreed with our request to install an additional 1,000 L.F. of sidewalk throughout the project limits. We also have submitted some additional widening on the south side of White Street east of the Locust Avenue intersection. This is fully funded at no cost to the City of Danbury. A&J has completed the additional work. A Semi Final Inspection was held with the A&J Construction, City of Danbury and representatives of ConnDot. A minimal punch list has been established and A&J will proceed with the punch list work. The City Traffic Engineer has requested some additional signage and several additional Dura Threm Crosswalks. ConnDot was receptive to the additional request. Once we receive the quantities from the City Traffic Engineer we will request a change order under our ARRA funding. Construction Services has administered and inspected the project with a total reimbursement to the City for personnel.

Lincoln Avenue: Project has been completed and is now in the closeout phase.

Tarrywile Parking Lot: The parking lot has been completed, using our in-house resources and City Bid Lists to reduce the cost. Punch list remains and will be completed as weather conditions permit.

Stadley Rough School Roof Project: The project was awarded to Silktown Roofing. The contractor has completed the roofing installation. 95% of the metal fascia is complete. The project is within budget and on time. The project is being administered by Construction Service.

Danbury Schools Boiler Project: Construction Services contracted and administered the asbestos abatement of the boiler rooms at Mill Ridge Primary, King Street Intermediate and Stadley Rough Schools. The abatement finished on schedule and within budget. This was a key element as not to hold up Honeywell's schedule. The overall boiler project is progressing on schedule.

Danbury High School Synthetic Turf Replacement Edward (Copper) Crotty Stadium: The project has been completed and the field G Max testing performed. The project was completed on schedule and within budget administered and managed by the Construction Services Division.

DHS & Rogers Park Tennis Court Repairs: Started at the six tennis courts at DHS and should be completed by the first week in September. Then the contractor will mobilize to Rogers Park to complete the crack repairs on the remaining eight tennis courts located in the park.

Head Start: We have assisted the Engineering Division with the planning of the project for constructability. The demo portion of the project has been bid and awarded. We will be managing and administering the construction.

Liberty Street Sidewalks: The sidewalk repairs and tree planting has been completed. The project was managed and administered by Construction Services.

Construction Services continues to issue road opening permits and inspection of contractors work within the City of Danbury's rights of way throughout the city.

Should you have any questions regarding this report, please do not hesitate to call me at 203-797-8069.

Engineering report submitted by Farid L. Khouri, P.E., City Engineer:

Assessment Projects:

- Olive Street and Tilden Road Area Sanitary Sewer Extension: At the July City Council meeting, the Council approved the project to go forward. The project will be out to bid the beginning of August.
- Ivy Lane, Cedar Street and Sylvan Drive Water Main Extension: At the July meeting, the City Council voted to "take no action" on the project.
- Deepwood Drive Sanitary Sewer Extension: Preliminary design and cost estimate completed. Mail survey sent out. Results have been received and will be compiled for the Council for final determination for the August agenda.
- Juniper Ridge Drive Sanitary Sewer Extension: Preliminary design and cost estimate completed. Mail survey sent out. Results are being received and will be compiled for the City Council for final determination for the September agenda.
- East Gate Road Sanitary Sewer Extension: Preliminary design and cost estimate completed. Mail survey sent out. Results are being received and will be compiled for the City Council for final determination for the September agenda.
- Karen Road Sanitary Sewer Extension: Preliminary design and cost estimate completed. Mail survey to be sent out within the next couple of months.
- Candleview Ridge Sanitary Sewer: Working on preliminary design and cost estimate.
- Hawthorne Terrace Water: Design work for Phase III began. City to take over operation and maintenance of water system next month. Waiting on State DPH final approval of contract.
- Ryders Lane and Southern Boulevard Sanitary Sewer Extension: Working on preliminary design and cost estimate.
- South Cove Road Storm Drainage and Road Acceptance: Working on preliminary design and cost estimate.

Traffic: Review of land-use development plans; handling of public complaints and routine repair and maintenance of traffic control signal devices and pavement markings.

Staff Engineers:

- Review various site plans, water and sewer applications, special exception applications, and subdivision applications for land-use approval of on-going development projects throughout the City.
- Field inspection of sanitary sewer, water mains and new roads are performed regularly on various developments.
- Review of drainage problems, including site visits, analysis and design.

Survey crew: Verification of R.O.W. on tree issues and locating storm drainage for the entire City using GPS equipment. Preparing surveys for in-house design of City projects.

Should you have any questions regarding this report or any other issues related to your Engineering Division, please do not hesitate to contact me at (203) 797-4641.

Highway Division report submitted by Duke Hart, Superintendent of Public Services:

The month of July is always a very busy time for the Highway Division. The construction crews were involved in three (3) new drainage projects in preparation for paving on Kingswood Road, Rod Line Road and Belair Drive.

Weather permitting, there are two (2) or three (3) crews out patching potholes, repairing aprons and curbs from winter damage. The spring sweeping program was completed mid-month and the sweepers are back on their maintenance schedules. Seventeen (17) new signs were installed and numerous repairs were made due to accidents or vandalism.

The downtown crew is out daily to police areas for litter, debris and illegal dumping. The recycling truck continues to be a very popular stop for our residents.

Should you have any questions regarding this report, please feel free to contact me at 203-797-4605.

Parks Maintenance submitted by Duke Hart, Superintendent of Public Services:

The month of July was very busy for the Parks Maintenance Division. The City's beaches and spray-park were in full swing. The crews have been hard at work maintaining all of the fields for the many sporting programs throughout the City. The Parks Maintenance Division ensures that all of these organizations have great fields to play on every day. The City Center Green is cleaned on Mondays and prepared on Thursdays for the weekend events. The Post Office Walk and Ives Street are cleaned on Mondays and Fridays.

The beaches are patrolled daily to insure a clean environment for the residents to enjoy. With the hot weather during the month, the beaches were a welcome relief to an unusually high number of residents.

Mowing continues to be on schedule at all of the schools, lawns of the inner City and the parks.

Should you have any questions regarding this report, please feel free to contact me at 203-796-1558.

Public Buildings report submitted by Rick Palanzo, Superintendent of Public Buildings:

EECBG Grant: There are three active projects that are being funded by the federal grant. The projects are in the highway garage, city hall and the library tech center. I will go into detail under each facility.

Public Works – Highway: A local contractor was awarded the installation of energy saving heating devices for the rear garage of the Highway Division. The old heating units were of an older less efficient technology. The new heaters use gas-fired infrared radiant technology that not only saves fuel but provides a greater, even comfort level. This project includes carbon monoxide detection and automatic ventilation in the rear garage which will provide an additional level of safety to protect the highway staff from accidental exposure to CO. The project will be completed in August.

City Hall: The energy saving project at City Hall is hidden in the penthouse mechanical room, but will be enjoyed by everyone in the building. This project includes changing the old air handler motors to new NEMA premium motors and adding variable frequency drives. What this means is the new motors are now a top efficiency design model and the speed that the motors turn will be determined by the temperature sensed through the building. This will increase comfort levels in the building and save energy.

A second project has begun which includes the conversion of the third floor kitchen into a handicapped accessible lavatory. This work is expected to be completed in September.

Old Jail Building: The Old Jail has received much needed repairs to deteriorating masonry and wooden accents. The Old Jail will retain its historical appearance and receive a new lease on life through the use of modern construction materials. This work is now 80 percent complete. We are awaiting the installation of replacement windows.

We have received funding from the State of Connecticut to perform a few minor changes to the old jail to accommodate the WIC program. We are working with the W.I.C. staff to accommodate their offices. The renovation should be completed in September. Once they have moved in to the old jail we will decommission the McLean house.

Hatters Park Building: The ADA compliant work at the Hatters Park Bowling Lanes has begun. The new ADA approved entrance has been completed and the accessible lavatory is under construction. This project will be completed in September. This project makes this city building ADA compliant and handicapped citizens will now be able to utilize this facility for recreation.

Danbury Public Schools: This \$11.5 M schools energy conservation project with Honeywell Corporation as the construction manager is well underway. The boiler rooms at Danbury High School, Broadview Middle School and Mill Ridge Intermediate School are receiving complete retrofits. Mill Ridge Primary School, King Street Intermediate and Stadley Rough School are receiving redundant boilers. Park Avenue and Broadview Middle schools are receiving a complete replacement of their steam traps. Danbury High School will also be receiving new wireless digital thermostats and new replacement windows. The window replacement portion of this project will take place next summer (2012).

The schools involved with the boiler room construction project will have hot water before the school season begins and heat will be available on October 1st. The heating portion of this project is anticipated

to be complete by the end of January 2012. This is a very large and ambitious project but it is proceeding on schedule. Thanks to all involved.

Requests for Maintenance and Repairs: Attached please find the statistical analysis for repairs and maintenance work that the Public Buildings Mechanics engaged in during the month of July 2011. In the month of July we received 648 new work requests and completed 109 work requests. In reviewing this report, you will find the repair time that was expended in major work categories, (current month versus previous month). Also listed is the total number of work order hours completed, (current month versus the previous month).

Our department was heavily engaged in plumbing repairs with a total of 226.00 man-hours dedicated to this service. The next largest area of concentration was in mechanical repair work, utilizing 167.50 man-hours of labor. Maintenance repairs came in as the third highest category with 65.00 man-hours.

Should you have any questions regarding this report, please do not hesitate to contact me at 797-4584. I am happy to discuss any portion of this report with you.

Public Utilities report submitted by David Day, Superintendent of Public Utilities:

Enclosed is the monthly report to the Common Council for activities that took place in July 2011. Also attached is the Public Utilities Vehicle Maintenance Report.

As of August 12, 2011 there are 119 hydrants out of service. Repairs to hydrants are continuing. I will be happy to review the information with you.

Should you have any questions regarding this report, please do not hesitate to call me 203-797-4593.

Sincerely,

Antonio Iadarola, P.E.
