January 28, 2013

Honorable Mayor Mark D. Boughton  
Honorable Members of the Danbury City Council  
155 Deer Hill Avenue  
Danbury, CT 06810

**RE: Monthly report for December 2012**

Dear Mayor Boughton and Members of the City Council:

I am pleased to present the Public Works Department report for the month of December.

The Public Works Department finished preparations for any winter emergencies that may arise. The sand and salt storage facility has received deliveries of material. A department-wide meeting was held for the managers responsible for snow emergency operations and plans were confirmed for standard operating procedures for snow removal activities. All of the equipment was ready for the snow events that occurred in the early part of the month.

The Parks Maintenance Division has started to perform maintenance and repairs to all of our summer maintenance equipment. The rest of the crew will perform repairs to the fences, bleachers, docks, lifeguard sheds and chairs, and paint all of the City's garbage cans in order to have them ready for the spring and summer seasons. All of this work will be accomplished in between snowplowing and shoveling the parking lots and sidewalks throughout the city.

Should you have any questions regarding any of the separately submitted division reports please call me at 203-797-4537.

## **Construction Services Report submitted by Thomas Hughes III, Superintendent:**

**White Street ARRA Project:** With the remaining balance of our ARRA funding , ConnDot has supported a formal request from the City of Danbury to install crosswalks and pedestrian signals on White Street. ConnDot has approved and processed the change order request. The contractor has ordered the electrical components and we will be moving forward with this additional work.

**Tarrywile Park:** Tarrywile Mansion Roof Replacement has been completed and came in under budget. This work was performed using our in-house resources and paid for through a LOCIP Grant. We are looking into replacing some leader pipes and gutters with the remaining LOCIP funds. There is a second project, period door replacement of three exterior doors, we have procured the material. This work will also be performed using our in-house resources and paid for by a different LOCIP Grant.

**Head Start:** Banton Construction continues to move forward. The building is weather tight at this point. The mechanical contractors have mobilized and started the MEP installation. We met with the director of CT Institute for the Communities, Jim Maloney and the Director of the Head Start program to address some additional security measures. The contractor is several weeks behind schedule due to weather events and feels once the structure is totally closed in and heated they will be able to make up the lost time.

**Citizens Volunteer Fire House:** Met with Chief Herald to review the scope of work for the replacement of the windows and siding using our in-house resources. The Chief has indicated we will be moving forward with the project shortly. The work will be performed using our in-house resource for labor and material.

Should you have any question regarding this report, please do not hesitate to call.

## **Engineering Report submitted by Farid L. Khouri, P.E., City Engineer:**

The following **assessment projects** are the only projects pending on the list based on residents' petitions:

1. Johnson Drive and Pembroke Terrace Sanitary Sewer Extension: Referred to an Ad Hoc committee at the City Council meeting.
2. Butternut Lane, Bayberry Lane and Boxwood Lane Sanitary Sewer Extension: Working on preliminary design and cost estimate.
3. Hawley Road Extension Sanitary Sewer Extension: Working on preliminary design and cost estimate.

**Long Ridge Road Bridge:** In-house design was finalized for construction. We are currently working with Corporation Counsel on securing an easement.

**East Franklin Street Bridge:** We completed the design to relocate the existing sewer in the brook with an above-ground pump station. Also, we met with the contractor and his engineer to address the scour problem that exists in the abutment walls of the bridge during the sanitary sewer relocation. We are working on securing a State permit to relocate the sewer line.

**Miscellaneous Schools (Park Avenue, Shelter Rock, Stadley Rough and Mill Ridge):** The preliminary design on the schools has started and we are meeting weekly with the design team to meet State deadlines.

**Traffic Engineer and his technicians** are reviewing various land-use development plans; handling of public complaints and routine repair and maintenance of traffic control signal devices and pavement markings. The Backus Avenue corridor traffic lights plans and specifications have been accepted by the State and will be bid out next month. Construction will begin in early spring of 2013 for one season.

**Staff engineers** are reviewing various site plans, water and sewer applications, special exception applications, and subdivision applications for various land-use approvals of on-going development projects throughout the City. Field inspection of sanitary sewer, water mains and new roads are performed regularly on various developments along with reviews of various drainage problems, including site visits, analysis and design.

**Survey crew** verifies various R.O.W., prepares surveys and easements for in-house design of City projects and assists other divisions in locating utilities in the field.

Should you have any questions regarding this report or any other issues related to your Engineering Division, please do not hesitate to contact me at (203) 797-4641.

**Highway Division Report submitted by Duke Hart, Superintendent of Public Services:**

The Highway Division responded to three (3) weather related events. Following each of the storms, the plow repair crew did the necessary repairs in order to keep the fleet in working for the next storm event.

Basin repairs and rebuilding were performed as the weather allowed. The construction crew was able to grade five (5) roads, Hull Road, Wilkes Road, Capitola Road, Durham Road, and Peasant Drive. They also installed an access road to maintain drainage on Old Mill Plain Road. Guide rail repairs were performed on Long Ridge Road at two (2) locations and another on West Redding Road. Three (3) locations were dredged to assist with the maintenance of the City's drainage infrastructure on Willow Lane, Miry Brook and Lakeside Avenue.

Weather permitting, the crews are out patching potholes. When they are able, the Park Maintenance staff assists with the pothole tasks. The paving crew was able to accomplish a paving project on Deer Hill Avenue and the curb and aprons repairs were completed for the season. A new sign was installed and numerous signs repairs were performed throughout the City. The lead collection program ended and the Christmas tree pick-up program started.

The recycling truck continues to be a popular and much appreciated service to the residents. Our most used piece of equipment is the garbage truck which is dispatch for the collection of garbage and debris in the downtown area.

Should you have any questions regarding this report, please feel free to contact me at 203-797-4605.

**Parks Maintenance Report submitted by Duke Hart, Superintendent of Public Services:**

November proved to be the busiest month of the year for the Parks Division. It took a couple of weeks to get the parks and school grounds back to standard. Transitioning from the fall sports season to the winter season was performed with leaf removal and fertilization. All of the veterans' memorials were prepared

for the Veterans Day ceremonies. Holiday lighting on the ornamental street lights in the downtown area was also installed.

Should you have any questions regarding this report, please feel free to contact me at 203-796-1558.

**Forestry Division Report submitted by Mark Miller, Foreman, Forestry Department:**

The Forestry Division crew was pleased to assist with the holiday decorating at the library plaza and the library building itself. Christmas trees were installed at City Hall. After the holidays are over, one of the trees will be planted by the front parking lot at City Hall.

Cut-backs and removals were performed at the following locations: Mill Ridge Primary School, Ohehyahtah Place, Brushy Hill Road, West Pine Drive, Gregory Street, Park Avenue, Deer Hill Avenue, Pleasant Street, Rogers Park, Fairfield Avenue, Moss Avenue, School House Road, King Street, West King Street, Ellsworth Avenue and Middle River Road. Some of this tree work resulted from storm damage.

The crew also assisted with plowing and sanding during snow events.

Should you have any questions regarding this report, please feel free to contact me at 203-797-4609.

**Public Buildings Report submitted by Rick Palanzo, Superintendent of Public Buildings:**

**City Hall:** The new seating and carpeting for the city council chambers has been selected, approved and the purchase orders have been sent. The project lead time for the products to be fabricated and arrive for installation is about eight weeks. This project should begin around April, 2013.

**Farrington Park – Westside Open Space:** The chow house at the Farrington Park is nearly ready for occupancy. The painter has some final work to do and then the flooring contractor can finish his work. I anticipate advertising in early spring as the possibility of obtaining a tenant in the dead of winter is remote.

**Danbury Public Schools:** The DHS energy project that began last summer with boiler replacements and window replacements was successful. This project has been performed well and will save the City money in energy costs. The final phase of this project will be to replace the auditorium heating and ventilating system with a new energy efficient heating, ventilating and air conditioning system. This has been a goal of many and will now come to fruition. There is a significant lead time required to obtain the required HVAC unit, but the goal is to have this unit operational before the air conditioning is needed.

The Alternative School on Locust Avenue has been undergoing a waterproofing project that includes masonry replacement, repair, and waterproofing as well as replacing the roof and gutter. The roof is tight and the leaders and gutters are functioning as well as anticipated. The decorative cornice, which is being manufactured in Georgia, is due to be installed before the end of January... The scope of work for this project has been expanded to include the lower level windows. Funds have been identified and transferred to permit this project to proceed. The windows have been ordered and we are awaiting their arrival. The installation should be in April.

**Old Library:** The elevator at the Old Library is out of service pending replacement of the main lift piston. The old piston removal and replacement will require three different contractors to perform the necessary work before the elevator company can install a new piston. The funding for this repair is

through the Local Capital Improvement program. This project has been approved by the State of Ct and we have contracted with Otis Elevator Co for the replacement. The work is on schedule and will be completed before the end of January.

**Old Jail:** The air conditioning project that began earlier this year concluded in December with the installation of energy efficient cooling for the front offices of the old jail building. The new units will not only provide cooling, at a lower cost.

**Requests for Maintenance Service:** Attached please find the statistical report of repairs and maintenance work that the Public Buildings Mechanics engaged in during the month of December 2012.

In the month of December we received 138 new work requests and completed 104 work requests. In reviewing this report, you will find the repair time that was expended in major work categories, (current month versus previous month). Also listed is the total number of work order hours completed, (current month versus the previous month).

Public Building mechanics were engaged in Plumbing repairs with a total of 91.00 man-hours dedicated to this service. The next largest area of concentration was in Electrical repair work, utilizing 76.50 man-hours of labor. General Mechanical work came in as the third highest category with 35.50 man-hours.

Should you have any questions regarding this report, please do not hesitate to contact me at 203-797-4584. I am happy to discuss any portion of this report with you.

**Public Utilities Report submitted by David Day, Superintendent of Public Utilities:**

Enclosed is the monthly report to the Common Council for activities that took place in November 2012. Also attached is the Public Utilities Vehicle Maintenance Report.

As of January 16, 2013 there are 96 hydrants out of service. Repairs to hydrants are continuing. I will be happy to review the information with you.

Sincerely,

*Antonio Iadarola, P.E.*

Antonio Iadarola, P.E.  
Director of Public Works
