

DANBURY HOUSING PARTNERSHIP
155 Deer Hill Avenue
Danbury, Connecticut 06810

March 20, 2013

Honorable Mark D. Boughton, Mayor
Honorable Joseph M. Cavo, City Council President
Honorable Members of the City Council
155 Deer Hill Avenue
Danbury, Connecticut 06810

RE: Annual Progress Report on Implementation of the Ten Year Plan to End Homelessness

Dear Mayor Boughton, President Cavo and Council Members:

We are pleased to submit for your consideration the sixth annual progress report of the Danbury Housing Partnership. Under the direct leadership of Ms. Carolyn Sistrunk, Executive Director of the Danbury Housing Authority, this report is submitted as required by Section 10-76(3) of the Code of Ordinances that directs the Partnership to provide annual reports to the Mayor and the Council summarizing the measures taken in the prior year to implement the Plan to End Homelessness in Ten Years as adopted by the City Council. This report covers the period of April 1, 2012 to March 1, 2013.

Connecticut continues to have a diverse economic expansion vs. economic depression along with the rest of the country's economic downfall in the mid 2000's. The national recovery is considered to be on the mends, but the impact can still be felt in local communities throughout our State. Our City's 2000 Census indicated that per capita household income was \$28,766, while the median income was \$53,935. Fast forward to 2012 when the **median income for Danbury was \$110,400**. The **median income for Danbury in 2013 is \$107,600** (see Table I and Table II). For the past five years, Connecticut has seen a decrease in housing permits, income, retail sales, tax revenues, exports, and gross state product. This in turn, has filtered down into our communities, including, Danbury.

The purpose of the Danbury Housing Partnership is to bring together representatives of the private, public and non-profit sectors to study and address housing issues within the community. The four dedicated sub-committee continue to make positive progression in addressing the goals of the Ten Year Plan. The Partnership has expanded its network of community agencies, businesses and organizations in a collaborative effort to create a regional approach to affordable housing opportunities and the need to assist our homeless population. Again, due to the unremitting economic struggles, and the impact to our State and local governments, there is an ever present incessant hardship in fulfilling our obligations to assist and sustain our local residents and the community agencies that strive to support them.

Danbury's Ten Year Plan is to encompass all homeless populations with the belief that everyone should be housed and that by providing affordable housing plans, this would attract employers and their employees to invest in our community.

The annual Point In Time (PIT) count assists local communities by determining the size and scope of the homeless population at the local level. By providing statistical information obtained by the PIT count, community services and programs can be adapted, adopted, measured, re-measured, performed and create plans of action for our local service providers to appropriately address our clients. HUD utilizes the data obtained from all local participating communities and reviews all supplied information with comparison of the entire countries PIT data. By comparative analysis of all information provided, HUD can then provide Congress with information on services provided and any gaps in services that may determine funding decisions. The ultimate decision of funding that will filter down to the local communities depends on accurate counts of the homeless population during that one evening of the Point In Time count.

Danbury conducted their Point In Time count on Wednesday, January 29, 2013 from 7:00-11:00pm. This year, unsheltered count was held for those individuals not staying in any of the City's four (4) shelters on this *one dedicated day of counting the homeless population*. The Point In Time count numbers for the Danbury area in 2013, including unsheltered individuals, showed a total of 180 individuals staying in local shelters, overflow and transitional housing (see Table IV). It was found that 25 individuals were found living in unsheltered areas through the City. The comparison of the Point In Time count for 2012 showed that a total of 144 individuals staying in local shelters, overflow and transitional housing (see Table III). The number of men staying at the shelters for this 2013 count shows almost triple the number residing vs. women at the shelter. The number of youth staying in the shelters is on the increase for the age group of 21-24 year olds. The Danbury Housing Partnership Social and Supportive Service Committee are investigating this increase age group that has become homeless.

The Danbury Housing Partnership continues to aggressively market, educate and conduct assorted outreach efforts to create community awareness of the issues of homelessness and the importance of creating and developing affordable rental housing, to include also transitional and permanent supportive housing. The Housing Partnership has entered into the social media approach as a means of promoting true community understanding of "being homeless". The Housing Partnership video can be seen on our website, Face book and You Tube. The teamwork method in utilizing the social media to further discuss the issue of homelessness within the community provides both an effective and efficient means of communicating within today's society.

The Partnership works in tandem with the Greater Danbury Continuum of Care (CoC), assorted community partners to successfully undertake a series of programs and projects to address homelessness, those at risk of becoming homeless, our veteran population and opportunities to create and sustain affordable housing. Under the excellent direction of Co-Chairs Milena Sangut and Michelle Conderino, our local CoC was able to successfully fund existing grant renewals in the amount of \$1,131,821.00. The Danbury CoC continues to be a part of the Balance of State CoC in order to maximize larger bonus dollars which can give the opportunity to create more viable housing projects.

The Danbury Continuum of Care voted with the Balance of State to choose a new software vendor for the HMIS data system. Homeless Management Information System (HMIS) is a computerized data collection application designed to capture client-level information on the characteristics and service needs of adults and children experiencing homelessness. HMIS implementation presents communities with an opportunity to re-examine how homeless services are provided in their community, to make informed decisions, and to develop appropriate action steps. The implementation of HMIS will also allow

communities service providers to build new alliances (regional) strengthen services, meet consumer needs in a more streamlined, unduplicated manner and also to be able to obtain information to guide future planning.

The CoC follows both the United States Interagency Council on Homelessness (USIC) Federal Opening Doors policy, along with the Connection Coalition to End Homelessness (CCEH) Opening Doors –CT goals and targets to:

- End chronic homelessness in five (5) years
- Prevent and end homelessness among veterans in five (5) years
- Prevent and end homelessness for families, youth, and children in ten (10) years
- Set a path to ending all types of homelessness

The above proposed goals and target achievements have also been supported by the Danbury Housing Partnership along with further cooperation from the Greater Danbury Continuum of Care. The CoC has initiated reference material and information on HUD's requirements to develop and implement a **coordinated access** and assessment system within our local community. This newly instituted requirement is being proposed and will be undertaken by all local shelters and Point of Entry agencies/organizations. By having coordinated access (CA) the principles developed will allow the following:

- Promotes collaboration among providers
- Honors client choice re: geography and services needed
- Incorporates provider choice in enrollment decisions
- Establishes standard, consistent criteria and priorities
- Ensures quality of housing and services are provided
- Ensures clear and easy access for consumers
- Improves efficiency, communication and knowledge resources
- Streamlines processing
- Uses systemic "housing first approach"
- Accountability
- Leverages the usage of HMIS
- Prioritizes enrollment based on need

The consistent work and viable programs that the CoC has incorporated into our community indicates their dedication and support system for our homeless population.

Another positive factor that has encompassed our community for 2011 is the constant attainment of the 10% goal of the Affordable Housing Land Use Appeals List. The affordable housing land use appeals procedure is a set of rules that allows developers to appeal to Superior Court local zoning and planning commission decisions denying affordable housing developments or approving them with costly conditions. In traditional zoning appeals, the developer must convince the court that the commission (i.e. municipality) acted illegally, arbitrarily, or abused its discretion by rejecting his or her proposed development. The procedure instead places the burden of proof on the municipality. Danbury is not subject to the procedures that fall under CCS 8-30g due to achieving the 10% mark.

The City of Danbury, along with significant assistance from local service providers continues to offer financial assistance, case management support and opportunities to assist those person and families who are experiencing homelessness or are at risk of becoming homeless. The City's Emergency Homeless Shelter remains busy with additional individuals staying overnight at the shelter and utilizing a variety of services in our Day Center. The immediate mission of the City's Emergency Shelter is to provide decent, safe and sanitary shelter to homeless adults. This continual mission is to meet our client's basic needs for food, shelter, and clothing. This 20 bed facility that incorporates 10 beds for men, 5 beds for women and 5 beds for our veterans is in constant use 7 days a week. For this reporting period (August 1, 2011 through August 1, 2012) the Emergency Shelter has had approximately 113 unduplicated individuals sleeping I the evening at the shelter and approximately 318 unduplicated individuals seeking assorted social services through our Day Center.

The Day Center at the Shelter offers a variety of services such as laundry, showers, lunch, mail delivery, phone usage, counseling sessions, etc. For this reporting period, the City's Emergency Day Center has had a total of 9,479 individual visits. Because of today's economic hardships, the City will strive to operate the Emergency Shelter/Day Center and will combine forces with other community resources to assist this vulnerable population.

The Danbury Housing Partnership has incorporated four (4) separate sub-committees to assist in providing support and insight into the homeless situation within our community. Each of these committees is entrusted in assessing the needs of homeless prevention and the development and production of affordable housing. The four (4) committees are:

- 1.) Social and Supportive Service Committee
- 2.) Committee on Housing and Community Development
- 3.) Financial Resources and Fundraising Committee
- 4.) Public Relations, Marketing and Education Committee

Social and Supportive Service Committee

The Ten Year Plan to End Homelessness developed and supported through Mayor Mark Boughton has entrusted the Social and Supportive Service Committee to actively seek current and additional services to benefit the homeless population or those at risk of becoming homeless.

The Committee continues to seek and ensure that there are adequate, appropriate and viable services within the Danbury community to assist those individuals and families in need in accessing and retaining housing choice and opportunities. For the past six (6) years, this sub-committee has assisted and continued to support one local Point of Entry (Dream Homes) for all referrals of the homeless population, and those who are at risk of becoming homeless. Most of our social service organizations collaborate in trying to streamline all referrals so as to not duplicate any type of services within Danbury.

The Social and Supportive Service Committee works in tandem with the Danbury Continuum of Care (CoC) to provide annual events that assist to safeguard our vulnerable population. This committee works effectively and efficiently to organize the annual Danbury Housing Partnership Breakfast. This year

(2012) the committee was able to secure the Matrix Conference and Banquet Center for this fundraiser and was extremely fortunate to have a dynamic guest speaker, the late Carol Walter from the Connecticut Coalition to End Homelessness (CCEH). The Connecticut Coalition to End Homelessness, in partnership with communities throughout the state, creates change through leadership, community organizing, advocacy, research and education. Their mission is to prevent and end homelessness in Connecticut.

Part of this year's DHP Breakfast fundraising event is to provide the opportunity of financial funding of Project Homeless Connect. This annual community event held in December is a one day event that gives services to the homeless and those at risk of becoming homeless. As many as 65 providers offered their services and various aid through a variety of assistance from SNAP benefit applications, eye tests, flu shots, haircuts, employment advice, dental services, breakfast and lunch provided, coats and assorted clothing and "goody bags". By allowing and presenting a hands on approach for services on this one day event, allows clients and providers to connect to obtaining immediate benefits and support. Project Homeless Connect was held on December 14, 2012 at Western Connecticut State University. Approximately **189 individuals** had the ability to access over 65 community social service providers.

This sub-committee strives to educate and remind the general public, and the community as a whole, of the true meaning of homelessness. The impact of being housed in a shelter, outside tents or abandoned buildings, living in ones car, or couch surfing from one home to another, can have long lasting devastating effects on a person's body and spirit. Our community continuous goals are to provide sobriety, structure, integrity, hopefulness, purpose, independence and eventual job and home placement.

The Continuum of Care, with support from this sub-committee continues to be a part of the Balance of State CoC in order to maximize larger bonus dollars which can offer the opportunity to create more viable housing projects. The CoC and the Social and Supportive Committee will also promote and encourage active participation with our community providers in following the requirements of HUD's McKinney – Vento Homeless Assistance programs which include:

- Increased Prevention
- Family rapid re-housing incentives
- Continued attention to chronic homelessness
- Permanent housing solutions
- Definition of homelessness
- Consolidate HUD's competitive grant program
- Improving homeless assistance in rural communities
- Performance-based focus
- Simplified match requirements
- Funding

This sub-committee will also adhere to the Opening Doors Ct documents and promote and integrate its goals and objectives into our local community. The vision and the core values that direct the work of the Reaching Home Campaign are articulated in the Opening Doors –CT framework. The core values embraced by Reaching Home are:

- Homelessness is unacceptable. It is solvable and preventable.

- There are no “homeless people,” but rather people who have lost their homes who deserve to be treated with dignity and respect.
- Homelessness is expensive. Invest in solutions.

The Social and Supportive Committee is presently working on significant goals within the next year:

- More local community agencies/organizations representation on the committee to offer varied insight and suggestions to assist the homeless population.
- Receiving monthly reports on HMIS statistical data on the homeless population and offer recommendations.
- Review plans of actions involving eviction prevention.
- Investigating programs in use in other municipalities involving flexible assistance funds.
- Continuing proposals for transitional and supportive permanent housing within the community and working directly with the DHP subcommittee Housing and Community Development.

Committee on Housing and Community Development

The Ten Year Plan to End Homelessness developed and supported through Mayor Mark Boughton has entrusted the Committee on Housing and Community Development to encourage and facilitate housing development, rehabilitation, preservation and related neighborhood improvement activities outlined in the Ten Year Plan. Due to the severe economic crisis that has encompassed the entire United States and this community, the cost factors of housing development, rehabbing existing properties, promoting affordable housing has been severely limited.

There have been some activities within the City of Danbury that has indicated the resourcefulness and determination in providing affordable housing for our community. The 60 unit housing project on Scuppo Road, called the Renaissance, has seen promising activity through the leadership and direction of Savings Bank of Danbury. This affordable housing project has been renovated and completely rebuilt for residents whose income is up to 80 percent of the area median income. Presently forty-one (41) units have been sold, three (3) are under contract and sixteen (16) are available for purchasing. Savings Bank of Danbury offers purchasing of these affordable units with special financing packages offered through CHFA, HDF and SBD. With a very tight review and acceptance of today’s mortgage applications, our community lender has found innovative ways in meeting both the demands of the housing market, and those families wishing to pursue the dream of homeownership.

Other affordable housing projects that have been available in our local community included:

- 41 Grand Street consists of twelve (12) units of rental housing with four (4) units deemed affordable and are recorded as “deed restrictions”.
- 18 New Street Vet House I consists of ten (10) units of housing for homeless veterans, four (4) of the units have project based vouchers. The additional six (6) units are funded through the United States Veterans Administration for transitional housing. Vet House II is presently being rehabbed and will be housing homeless veterans and families.

- Victorian Meadows offered by local developer Bob Botello has developed and designed both market rents and affordable rental and housing units. Mr. Botello has built thirty-nine (39) units, five (5) being affordable.
- Habitat for Humanity has a proposal of five (5) affordable units to be built/rehabbed.
- Mr. Joe DaSilva has a proposal of building sixteen (16) units in the local community.
- The Connecticut Institute for Communities has proposed forty-eight senior housing units and retail businesses at the old Police Station location on Main Street. There have been talks with the City that Mr. Maloney may be requesting an increase in the number of units to be built.
- Local community developer and builder, Jeff Bruno and family are proposing to build ten (10) units on Scuppo Road and an additional ten (10) units (older proposal) at 28 Division Street.

The mere number of units and proposals made by local developers within our community demonstrates the fortitude and determination that some individuals are willing to make in the City of Danbury to support the lagging housing industry.

The Jericho Partnership has amalgamated with St. Paul's Lutheran Church located on Spring Street. Jericho is partnering with local church affiliates, non-profit organizations, local support service agencies, etc., to recruit and train volunteers, provide strategic planning, grant-writing, fundraising and counseling assistance to provide assorted services to the underprivileged and homeless individuals/families within the local community.

The Committee on Housing and Community Development has developed a local map of downtown Danbury delineating available properties, including their addresses, property owner's name and phone number, map numbers, City's assessor information and other pertinent information that will be made available and assessable to the general public via the City's computer system. The planning stages are being synchronized and finalized with the City's computer technical assistance department and will be placed in the system by the summer of 2013.

The sub-committee will continue to meet with local developers and planners to strive to encourage the building of affordable housing for our community and also to encourage a regional approach to affordable housing production within each separate local Town or City.

Financial Resources and Fundraising Committee

The Ten Year Plan to End Homelessness developed and supported through Mayor Mark Boughton has entrusted the Committee to pursue any financial resource necessary to implement the initiatives identified in the Ten Year Plan and for coordinating efforts to avoid duplication and unnecessary competition among organizations committed to the achievement of ending homelessness.

This sub-committee has been responsible for the annual Danbury Housing Partnership breakfast held every October. This annual fundraising event proves to be successful in bringing attention and education

to the general public on the understanding of the homeless. The October 18th event was held at the Matrix Conference and Banquet Center. The Partnership is pleased to announce that over 200 people attended the breakfast with the final amount raised at \$8,408.00. Awards were presented to the following individuals demonstrating their continuous efforts to assist our homeless population:

1. Community Partnership Award: Reverend Wanda Payton and Meredith Payton (CCOM)
2. Supportive Service Award: Michael Finn, Emergency Shelter Coordinator, City of Danbury
3. Business Partnership Award: Paul Mitchell, The School of Danbury and TCB Salon and Spa

Our guest speaker was the late, Carol Water, Executive Director of Connecticut Coalition to End Homelessness (CCEH) who provided updated information on the Opening Doors-CT proposal, the annual Point In Time Count across the United States in January, and the plight of veterans, youth, individuals and families in crisis and becoming statistics in the homeless population trends.

The monies obtained through the fundraising efforts of the Danbury Housing Partnership Breakfast provide additional resources for Project Homeless Connect. This annual event held in December at Western Connecticut State University is a one stop shopping day of a wealth of support services and agencies dedicated to offering recommendations and viable assistance to those who are homeless or at risk of becoming homeless in the local community.

Going into the sixth (6) year of this Ten Year Plan to End Homelessness, the Financial Resources and Fundraising Committee has suggested that all four (4) sub-committee should revisit the original plan and make appropriate changes and update information. When the Ten Year Plan was developed and placed with specific plans of action for each sub-committee, no one could have foreseen the economic downturn that has plagued most local communities. Funding resources have been limited, reduced, or eliminated through Federal, State and local government bodies. Innovative means to fund specific programs, policies and strategies has created a network of survival type stratagems for local support agencies and organizations.

Public Relations, Marketing and Education Committee

The Ten Year Plan to End Homelessness developed and supported through Mayor Mark Boughton has entrusted the Committee to keep the Mayor, City Council and the general public informed about the progress being made by the Partnership to implement the Ten Year Plan.

The sub-committee is responsible for the coordination efforts with the other three (3) sub-committee's to assist in developing marketing materials, updating and educating the general public and supporting any fundraising efforts.

The Public Relations, Marketing and Education Committee of the Danbury Housing Partnership strives to aggressively market and develop outreach efforts to steadily create community awareness of the issues of homelessness and the importance of the community becoming involved in the support and development of affordable housing units for purchase and/or rent. The creation of a video that was developed by a

member of the Housing Partnership and presented at the annual Partnership Breakfast on October 18, 2012 at the Matrix Conference and Banquet Center has been utilized as a marketing awareness campaign tool and has been placed on various social media avenues.

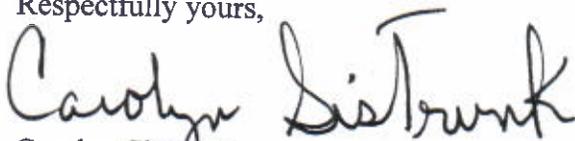

The social media method enables the Danbury Housing Partnership to create an instrument of discussion in understanding the true meaning of "homelessness". The purpose of media attention allows the general public to view what homelessness entails on a daily basis. The stigma of a homeless person on the side of the street panhandling is not a true picture of an individual or a family seeking overnight accommodations in a homeless shelter, or receiving meals at a soup kitchen, or endless paperwork filing for State Assistance, unemployment benefits, medical aide, etc. This sub-committee will also strive and encourage active participation of other surrounding communities to do their specific part in assisting their own homeless population.

The Public Relations Committee will continue to improve outreach and linkages to existing training, education and literacy programs with assistance of Project Homeless Connect. This annual event entails a variety of social service agencies, non-profit organizations, support services, local businesses and church entities, all that offer a multitude of assistance both immediately and/or by appointment within that particular agency.

While great progress continues to be made within the greater Danbury region, the economy poses a deterrent to fully address the housing and homelessness issues faced within our community. Though there may be some obstacles in this upcoming year in meeting the objectives of the Ten Year Plan to End Homelessness, the Danbury Housing Partnership and the four (4) sub-committee's, will attempt to expand its efforts to create community awareness on housing issues, increase coordination with State and Federal agencies and to fully engage the private sector to continue to provide financial and logistic support for our efforts to implement the Mayor's Ten Year Plan to End Homelessness.

The members of the Danbury Housing Partnership would like to thank Mayor Mark Boughton and all members of the City Council for their continual support in addressing the issues that are facing our Danbury community.

Respectfully yours,

Carolyn Sistrunk
Chair, Danbury Housing Partnership

Cc: Sue Zaborowski, Secretary

Total	39	93	12
			144

TABLE III

Point In Time Facts

- PIT was conducted on January 25, 2012 from 9PM to 11PM (Danbury has a shorter window due to the shelters opening later in the evening than most)
- PIT only conducts the unsheltered count every 2 years. In 2011 18 individuals were found outside.
- Danbury saw a significant rise in sheltered numbers this year.
- 67 men, women and children were in Danbury's shelters in 2011
- 90 men, women and children were in Danbury's shelters in 2012
- 50% increase in women in the shelter
- 44% increase in men in the shelter
- 30% decrease in children in the shelter
- As the temperature outside during this year's count was significantly higher than last year's count, it is not believed that last year's unsheltered came indoors this year.
