Total number of lots in survey

Color-coded maps showing how the owners of the lots that would be served voted have also been prepared. We have attached copies of them to this letter for our information and review.

We have checked with the City Health Department regarding the existing septic systems in this area. Presently, they don't have any outstanding orders for septic system failures or any known existing septic system failures.

We have also checked with the State of Connecticut Department of Health – Water Division. They do not have any outstanding consent or department orders for this project area. There were 2 violations in the past two years but both violations were satisfactorily addressed by the Cornell Hills Association.

Hopefully, this information will assist you in your deliberations as to whether this sanitary sewer construction project and/or this water construction project should continue to go forward.

If you have any questions, please feel free to contact me.

Very truly yours,

Farid L. Khouri, P.E.
City Engineer
